You can open your Game Menu and set the following settings: General Settings -> BGM setting -> Screen mode . Make sure that Screen mode is set to "Adjust settings" and the BGM is set to "None". NOTE: If you have an XBOX 360 controller connected to your PC, be sure to connect it. NOTE: If you experience some freezes or lag during the gameplay, make sure you disable "Force Hardware Acceleration" in the video settings of your XBOX 360 controller. NOTE: To disable the cheats, go to the main game folder (e.g. C:\Users\F\AppData\Local\MugenGameEngine\Local Setting.ini) and open the Local setting.ini file. Scroll to the bottom of the file and find the lines with cheats [Cheats] and disable them (remove the [] brackets) by changing them to cheats = "". Return to your game menu and go to the Options tab. Set the following options to "None": Controller, Hardware accelerator, Mouse and Joystick. Download the game here M.U.G.E.N. 2010 Xbox Download the file DQ2.EXE in the main game folder. Unzip the downloaded file. Run DQ2.EXE in the main game folder. Additional information. Disable the cheats in the local setting.ini file. Use the controller (e.g. XBOX 360, NES, SNES, GameCube controller, Xbox controller). Disable the cheats in the local setting.ini file.
